

Mini Bracket

DESCRIPTION

Metal part for wall-mounting [Rejiband](#) trays of widths 60 and 100, and also mounting boxes or other components on trays of any width.

ADVANTAGES

For wall-mounting either horizontally or vertically as shown in the diagrams.

Due to its design it is a very versatile piece enabling boxes or other components to be mounted in various positions on the tray's mesh.

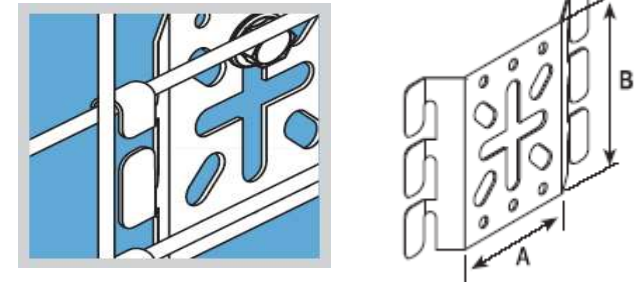

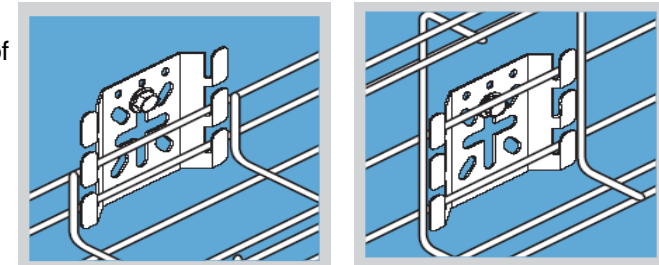

FINISHES

Sendzimir galvanised: (G.S.) (UNE-EN 10142) for indoor installations in a dry atmosphere without contaminants.

(The G.S. finish is supplied packed in boxes for storage).

Hot galvanised: (G.C.) (UNE-EN ISO 1461) for outdoor, industrial, marine, rural or demanding indoor installations.

Passivated stainless steel AISI 316: suitable for installations in demanding environments and sea water, industrial applications, etc.
